PROFILE

Passionate about coding with a strong foundation in pedagogy. Transitioned from primary education to web development, bringing exceptional problem-solving skills and a strong grasp of educational tools and collaborative project management. Adept at translating complex concepts into easy-to-understand formats, as evidenced by a robust portfolio of front-end projects.

SKILLS

- JavaScript, React, TypeScript
- Responsive Web Design
- Version Control/Git
- Automated testing
- APIs
- Problem-Solving, Analytical Mindset
- Project Management
- Strong Communication, Teaching Background

EXPERIENCE

PRIMARY SCHOOL TEACHER

Really Great School

2016 - Present

Leveraged educational technology to enhance learning experiences. Managed classroom projects, emphasizing clear communication and interactive engagement.

EDUCATION

FRONTEND DEVELOPMENT

Code2Career Bootcamp

2023

BACHELOR'S DEGREE IN PEDAGOGY

Really Great University

2014 - 2016

PROJECTS

INTERACTIVE LEARNING PLATFORM

The educational web app you developed serves as a dynamic platform for connecting teachers and students, utilizing ReactJS for a responsive and interactive user interface. Leveraging the GoogleMaps API, the platform allows for geolocation-based searches, enabling students to find nearby educators or online resources tailored to their learning needs. Key features include customizable profiles for teachers to showcase their skills and availability, and a review system that helps maintain a high standard of teaching quality.
